

WHITE LABEL

Your own video consultation application

Webcamconsult in your own look & feel

If you opt for Webcamconsult as a white label solution, the platform will have the look and feel of your own house style. Your web domain will be used for the pages seen by the patient or client. E-mails are sent from your own domain, and the Webcamconsult logo is no longer visible anywhere, despite it relating to the Webcamconsult environment.

Webcamconsult as a white label has the following options:

1

OWN LOOK & FEEL

The format of all application pages – including menus – can be adapted to the look & feel of your organisation, so the entire platform has been designed in your house style.

Our white label solution is also very suitable for partners wishing to integrate Webcamconsult within their platform, enabling you to offer our video consultation solution within your application in your own design.

2

YOUR OWN E-MAIL AND WEB DOMAIN

Without using Webcamconsult as a white label, users of the platform see the Webcamconsult.com domain with your name as the subdomain: **https://uwziekenhuis.webcamconsult.com.**

With our white label solution, we ensure that your own domain and subdomain are used, for example: **https://beeldbellen.uwziekenhuis.nl.** We also ensure that all system e-mails are given the sender you require, for example: **beeldbellen@uwziekenhuis.nl.** The recipients of the e-mail only see your name and e-mail address.

3

CUSTOMISED SOLUTIONS WITHIN YOUR TEMPLATE

Er zijn mogelijkheden om op maat vormgeving of onderdelen aan te passen of toe te voegen. Het is mogelijk om bijvoorbeeld dashboard menu's en invulvelden aan te passen. Ook kunnen extra functies worden toegevoegd of juist weggelaten worden.

Your personal "screen care platform in the cloud", customised and seamlessly integrable with your own website and business applications (EPD, ERP, CMS and CRM).
